# HTML Iframes

[< Previous](#)[Next >](#)

An HTML iframe is used to display a web page within a web page.

## HTML Iframe Syntax

The HTML `<iframe>` tag specifies an inline frame.

An inline frame is used to embed another document within the current HTML document.

**Tip:** It is a good practice to always include a `title` attribute for the `<iframe>`. This is used by screen readers to read out what the content of the iframe is.

## Iframe - Set Height and Width

Use the `height` and `width` attributes to specify the size of the iframe.

The height and width are specified in pixels by default:

### Example

```
<iframe src="demo_iframe.htm" height="200" width="300" title="Iframe Example">
</iframe>
```

[Try it Yourself »](#)

Or you can add the `style` attribute and use the CSS `height` and `width` properties:

### Example

```
<iframe src="demo_iframe.htm" style="height:200px;width:300px;" title="Iframe
Example"></iframe>
```

HOW TO

# Iframe - Remove the Border

By default, an iframe has a border around it.

To remove the border, add the `style` attribute and use the CSS `border` property:

## Example

```
<iframe src="demo_iframe.htm" style="border:none;" title="Iframe Example">
</iframe>
```

[Try it Yourself »](#)

With CSS, you can also change the size, style and color of the iframe's border:

## Example

```
<iframe src="demo_iframe.htm" style="border:2px solid red;" title="Iframe
Example"></iframe>
```

[Try it Yourself »](#)

An iframe can be used as the target frame for a link.

The `target` attribute of the link must refer to the `name` attribute of the iframe:

## Example

```
<iframe src="demo_iframe.htm" name="iframe_a" title="Iframe Example"></iframe>  
  
<p><a href="https://www.w3schools.com" target="iframe_a">W3Schools.com</a></p>
```

[Try it Yourself »](#)

## Chapter Summary

- The HTML `<iframe>` tag specifies an inline frame
- The `src` attribute defines the URL of the page to embed
- Always include a `title` attribute (for screen readers)
- The `height` and `width` attributes specify the size of the iframe
- Use `border:none;` to remove the border around the iframe

## HTML Exercises

### Test Yourself With Exercises

#### Exercise:

Create an iframe with a URL address that goes to <https://www.w3schools.com>.
